PROFILE

Highly skilled Frontend Web Developer with over 2 years of experience specializing in building modern and responsive user interfaces using React. Adept at translating design concepts into functional, interactive web applications. Proficient in HTML, CSS, SCSS, JavaScript and TypeScript with a strong focus on delivering visually appealing and user-friendly websites. Detail-oriented and committed to delivering high-quality code while adhering to the best practices. Passionate about staying updated with the latest web development trends and technologies to create cutting-edge digital experiences.

EXPERIENCE

PERSONAL PROJECTS

1. NORDIT

SEP 2022 - NOV 2022

- Created Nordit, an accounting app for expense and income tracking using React.
- Designed a user-friendly interface with sorting and editing capabilities
- Developed the dashboard for monthly financial insights
- Ensured data security and user authentication using Firebase and Google Authenticator

2. DAB KITCHEN

JAN 2023 - MAR 2023

- Designed and developed a sleek e-commerce website focused on delivering an exceptional user experience
- Streamlined the ordering experience with a user-friendly contact form and clear pricing
- Optimized performance by using minimal external libraries

FREELANCE PROJECT

1. GLOBAL TRAIN

APR 2023 - MAY 2023

- Developed a website for GlobalTrain company using React and Firebase for admin authentication and database management
- Created a user-friendly landing page with a functional form for easy communication with admin
- Implemented a unique Identification number for each package to enhance tracking
- Designed a tracking page enabling users to search for their package and get real time information
