PROFILE

I'm a detail-oriented Full-Stack Web Developer with a Mechanical Engineering background, and I enjoy creating smooth, scalable, and user-friendly web applications. I work mainly with React, Node.js, NextJs, Express, and MongoDB, and I love collaborating with others to turn ideas into real, practical solutions. I have a strong analytical mindset, but I'm also very open to learning and exploring new technologies as they evolve. I communicate clearly, enjoy teamwork, and always aim to deliver clean, reliable work. I'm excited to contribute to meaningful projects and help build products that genuinely make people's lives easier.

EDUCATION

UNIVERSITY OF UYO, UYO
September 2015 - August 2023

B.ENG

WORK EXPERIENCE

INDEPENDENT PROJECT, WEB DEVELOPER

October 2024 - December 2025

- Designed and built a school performance management system that records, updates, and organizes student academic data with high accuracy.
- Developed an automated engine that generates full class result sheets in under one minute, significantly reducing administrative workload.
- Implemented efficient interfaces and optimized database structures to improve teacher workflow and ensure fast processing of large student records.

FREELANCE PROJECT, WEB DEVELOPER

May 2025 - June 2025

- Built and deployed an e-commerce web application showcasing a range of electric vehicles, allowing customers to view specifications, compare models, place orders, and submit enquiries smoothly.
- Demonstrated strong full-stack development capabilities and user-focused design.

FREELANCE PROJECT, WEB DEVELOPER

May 2023 - June 2023

- Developed a logistics tracking system that allows customers to monitor their product location in real time using a tracking ID.
- Built an admin dashboard for managing and updating tracking statuses efficiently.
